2. Answer the following: HTML has a way to scale an image down by entering a smaller width in the width attribute of the img tag. Why is scaling it down in Photoshop a better idea?

It takes longer and is more inconvenient to load images on a webpage before resizing, so Photoshop is a better idea.

3. Answer the following: What main message were you trying to communicate with your original image? Explain how the different parts you put together helped communicate that message.

That I am fly which is a modern term that I dress well. I removed the background from my image and put it on a retro flyer for the shoes that I wore in the image and using the text fly as I stand on the "moon". The message is "stay fly" (literally on the moon and figuratively)
