

Lab 12

Create a word document, pdf or use the "write submission" option in blackboard to provide the following:

1. Submit the url for the shell game with alert boxes.

<https://lekalee.github.io/ist263/lab12/lab12>

2. Submit the url for the shell game with messages displaying in browser.

https://lekalee.github.io/ist263/lab12/lab12_preview.html

3. Answers to the following questions:

- a. Our shell game is very basic. What functionality do we need to add to make it more like a real game? List at least 3 improvements. I'm not looking for code here just your thoughts.

- Adding color contrast
- Changing fonts
- Opening the walnut to show whats under when the right one is clicked
- Possible sound connection to the outcomes

- b. In lecture and lab, we talked about the events: onclick, onblur and onload. Pick one of the other events in the list above and give me a scenario for how you could see it used on a web page.

With onclick the walnut image could be changed to the ball under when the right one is chosen

- c. On this week's lecture slides, slide 7 lists example uses for JavaScript. What is another use for JavaScript? Some research will be needed.

Javascript can be used to create interactive digital art

4. Submit answers to the following:

- a. What questions did you have about the lab? What didn't you fully understand? N/A

- b. What was the hardest part of the lab? N/A

- c. Rate your comfort level with this week's topics. 1

1 ==> I can do this on my own and explain how to do it.

2 ==> I can do this on my own without any help.

3 ==> I can do this with help or guidance from others.

If you choose this level, please indicate HOW this person helped you.

4 ==> I don't understand this at all yet and need extra help.
